

Instructions for working with an offline client

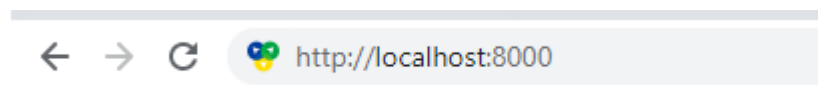

1. Download the archive with the offline client from the link <https://defirex.org/assets/data/autonome-client.zip>
2. Unpack the archive
3. Run server.exe

4. The local server will start

5. Open a new browser tab with the Metamask extension
6. In the address bar, enter <http://localhost:8000>

7. An offline page of the personal account will open, in which it is possible to perform all the same operations as in the personal account of the service <https://defirex.org>
